Profile

Experienced Software Engineer with a background in full-stack development, legacy system modernization, and cloud-based applications. Skilled in backend APIs, frontend development, and Azure-based deployments. Strong focus on clean architecture, scalability, and agile delivery. Brings strong leadership, mentoring, and communication skills developed through technical mentorship and cross-functional collaboration.

Skills

Core Skills: C#, TypeScript, SQL, Node.js, .NET Core, React, Azure, Azure DevOps, Unit Testing, REST APIs, Containerization

Also Worked With: Angular, Blazor, GraphQL, HTML, CSS, CI/CD, Git, RabbitMQ, Entity Framework Core etc...

Soft Skills: Leadership, Mentorship, Communication, Team Collaboration, Problem Solving, Adaptability, Initiative

Professional Experience

Investec – Johannesburg (Remote – UK Market) (Nov 2025 – Present)

Senior Software Engineer – Corporate Banking Digital (CBD)

- Part of Investec's Corporate Banking Digital team, contributing to the UK bank's mid-market corporate strategy by helping design and deliver key digital initiatives.
- Balance hands-on software development with solution design, documentation, stakeholder engagement, and coaching team members.
- Work on a strategic, organization-wide initiative, broadening technical and collaborative skills.
- Focus on designing scalable solutions and guiding teams through complex delivery.

Investec – Johannesburg (Remote – UK Market) (Jan 2024 – Oct 2025)

Software Engineer

- Full-stack development in the Private Companies Client Digital Experience team.
- Built and maintained client-facing applications using React and .NET.
- Improved system scalability and user experience.
- Collaborated with product teams to support agile delivery.

ChannelCenter – Remote (May 2023 – Jan 2024)

Full Stack Developer

- Developed applications using React, TypeScript, .NET, and Azure.
- Built secure and scalable APIs.
- Implemented Azure pipelines for deployments and monitoring.
- Participated in agile ceremonies and team planning.

NML – Cape Town (Aug 2022 – May 2023)

Software Developer

- At FNZ: Developed backend services in C# and .NET, collaborated on architecture design and code reviews, resolved bugs with QA.
- At Stor-Age: Delivered full-stack solutions, supported CI/CD, participated in daily stand-ups and sprint activities.

OUTsurance – Centurion (Dec 2019 – Jul 2022)

Software Developer

- Delivered .NET Core APIs for life insurance products.
- Worked on external integrations for Shoprite Funeral Cover.
- Built frontend components using Angular.
- Managed DevOps tasks using Azure DevOps.
- Applied architectural principles for maintainable code.

WeThinkCode_ – Johannesburg (Nov 2018 – Dec 2019)

Technical Mentor

- Mentored first-year students on software engineering fundamentals.
- Supported technical growth and soft skill development.

- Completed the WeThinkCode_ program 6 months early.

OUTsurance – Centurion (Feb 2019 – Jun 2019)

IT Intern (OUTvest)

- Main focus to learn and assist as much as possible
- Assisted in Xamarin mobile development.
- Supported web development document generation automation (DocFusion).

Education

Software Engineering Program | WeThinkCode_ – Johannesburg | May 2018 – Dec 2019

Focused on C programming and core software engineering concepts. Completed the program ahead of schedule.

BSc Geology | University of Pretoria – Pretoria | Jan 2013 – Dec 2017

Developed critical thinking and analytical skills through scientific study.
